Response to Amendment

Amendment filed on March 31, 2009 has been entered. Claims 2, and 6-7 have been cancelled. Claims 1, 3-5, 8-31 are pending in the application. Claims 11, 13-16 and 23-31 are withdrawn from further consideration by the examiner, 37 CFR 1.142(b), as being drawn to a non-elected invention and species.

Status Identifiers

Status Identifiers (Currently Amended) in claims 13, 15, and 16 should be changed to (Withdrawn) since species of claims 13 (species A(iii)), 15 (species B(i)-(iii)), and 16 (species B(i)-(iv)), were not elected by Applicants in Response to Election/Restriction Requirement filed on 11/14/2008.

Status Identifier (Currently Amended) in claims 27-29 and 31 should be changed to (Withdrawn) since they now depend on withdrawn claims 25 and 26.

Status Identifiers (Currently Amended) in claim 23 should be changed to (Withdrawn) since invention of claim 23 was not elected by Applicants in Response to Election/Restriction Requirement filed on 7/23/2008.

Abstract

1. Objection to the abstract of the disclosure because of typographical error has been withdrawn due to amendment. New corrected Abstract is acknowledged.

Claim Objections

2. Objection to claims 8, 10, 16-22 under 37 CFR 1.75(c) as being in improper form has been withdrawn due to amendment.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1, 3-5, 8-10, 12 and 17-22 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1 recites in lines 3-4 that precursors for an inorganic and an organic components are activated in one or more plasma sources, and then in lines 6-8 recites *contradictory* limitation that precursors for an inorganic and an organic components are activated in two or more plasma sources. For examining purposes the language of claim 1 was interpreted as language of original claims 1, 2, 6-7, namely, precursors for an inorganic and an organic components being activated in one or more plasma sources such that two or more plasma sources are *optional*.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim Rejections - 35 USC § 103

6. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are

Art Unit: 1792

such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

7. Claims 1, 3-5, 8-10, 12, and 17-22 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Yamada et al (US 5024927).

Yamada et al is applied here for the same reasons as set forth in paragraph 5 of the Office Action mailed on 12/31/2008.

As to claims 3-5, 8-9, 18-22, limitations of these claims are not addressed as further limiting *optional* two or more plasma sources.

Conclusion

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
